A developer driven by the want for success, always learning in order to grow a larger skill set and improve upon clean code practices. Looking to be the next command line hero in innovation in order to succeed. Builds full stack applications for both professional and personal growth.

SKILLS:

JavaScript • NodeJS • Express • MVC • HTML5 • CSS3 • Grid • Flexbox • React • TDD • Agile (Scrum) • Object Oriented Programming (OOP) • ALAX • JSON • Restful APIs • Single Page Applications (SPAs) • Responsive Design / Mobile • Structured Query Language (SQL) • Relational Databases • NoSQL Databases • GitHub • Adobe Suite • FIlmora 9/Pro • Sony Vegas Pro • Mongoose • MongoDB

ACADEMIC TRAINING

We Can Code It

CERTIFICATE OF SOFTWARE DEVELOPMENT
AUG 2019

PROJECTS

Welp...

MVC · NODE.JS · EXPRESS · HANDLEBARS · HTML5 · CSS3 · MONGODB

Welp is a review site mirrored from Yelp. The site uses an MVC structure for quick initial load time, as well as easy management of the data flow. Users can add and delete their own reviews. Handlebars was used as the view engine to dynamically render content on the page, and to ensure proper content was presented.

Muzify

API · NODE.JS · EXPRESS · MONGODB · JAVASCRIPT · HTML · CSS3

Muzify is a music site mirrored on Spotify. This app uses a disconnected API for the back end logic, with a front end in JavaScript to pull information and render as a Single Page Application. A custom component library was created for this project to ensure homogenization of methods across all files. The app would render an embedded video of the song being looked for, which the user had complete control over.

WORK BACKGROUND
